PARTNERSHIP

ADVAGEN & SPINMATE partners

SPINMATE partners

**SPINMATE project is proud to announce a new partnership with the ADVAGEN project.**

The goal of the collaboration is to ensure the effective use of knowledge generated from the two projects with ongoing initiatives and relevant stakeholders looking for synergies to push innovation by organizing dedicated synergy activities.

Activities will include participating in clustering workshops and the organisation of 1 clustering session. Therefore, through this partnership, both **ADVAGEN** and **SPINMATE** will have opportunities to reach a wider target group in the battery industry and circular economy.

**SPINMATE** is now reinforced in its project pathway towards impact from higher visibility of project results on innovative and scalable generation of solid-state battery (SSB) cell manufacturing in battery and EV industries.

SPINMATE and ADVANGEN projects are funded by European Commission under the Horizon Europe program under the topic: HORIZON-CL5-2021-D2-01-05 and HORIZON-CL5-2021-D2-01-03 successively. Manufacturing technology development for solid-state batteries (SSB, Generations 4a - 4b batteries) (Batteries Partnership), started in 1st of August 2022 and ending in 31<sup>st</sup> of July 2026.

**SPINMATE**

**Title: Scalable and sustainable Pilot line based on INnovative MAnufacturing TEchnologies towards the industrialization of Solid-State Batteries for the automotive sector**

Website: <https://www.spinmate.eu/>

**Title: Development of ADVanced next GENERation Solid-State batteries for Electromobility Applications**

Website: <https://www.advagen.eu/>
